INTRODUCTION

The project Turf management is helpful to get to manage the activity of turf. Admin is the main user of the website who will manage every activity. This application can be used by the Football enthusiastic players to book the available turf according to their need.

This application not only helps the players but also the turf owners who want to expand their business through online medium. It maintain the List of Turf and Booking History so it will be easy to access any time 24*7.

This system has replaced the manual process of going to the location to book with an automated online process. Through, this application admin who is one of the users of this application will manage all the activities of Users such as search user, Add Turf, Manage Turf, and View Bookings.

MODULES

➤ ADMIN

- Login
- Register and manage Turf locations
- Register and Manage Turf managers
- View feedback
- View complaints and post reply

➤ MANAGER

- Login
- Register time slot with fees
- View booking and manage
- View payment

MODULES

➤ USER

- Register
- Login
- View turf locations
- Book turf
- View booking status
- Add payment
- Post feedback
- Post complaint and view reply

Methodology

Turf playground are used to play various sports like football, rugby, tennis, cricket, etc. People enjoy playing on the turf, it has vibrant environment and very safe to play. Many school teams and clubs prefer turf playground for practice and training purpose. Sometime it becomes difficult to book turf playground because of timing issue or the slot getting booked previously. This sports ground booking website is proposed for booking the turf in an easy and efficient way. It has three modules namely, Admin, Manager and User. Admin can login and can add turf locations, assign manager by creating login credentials for manager, add price details for the particular turf, manages turf and view the details of sports venues booking for all locations. Managers assigned by the Admin are different for different Turf playground locations. User can login to the system by registering details, he/she can login using credentials, he/she can check the rates, view the request for turf booking for the respective location, and manager can accept booking, generate bill and can view the booking history. Users can check the availability of the turf, select timings, fill personal details, can pay by providing bank details or card details and he/she can also see view previous turf booking history.

Tables

Booking

| | # | Name | Type | Collation | Attributes | Null | Default | Comments | Extra |
|--------------------------|----|---|--------------|--------------------|------------|------|---------|----------|----------------|
| <input type="checkbox"/> | 1 | b_id  | int(11) | | | No | None | | AUTO_INCREMENT |

Data Flow Diagram

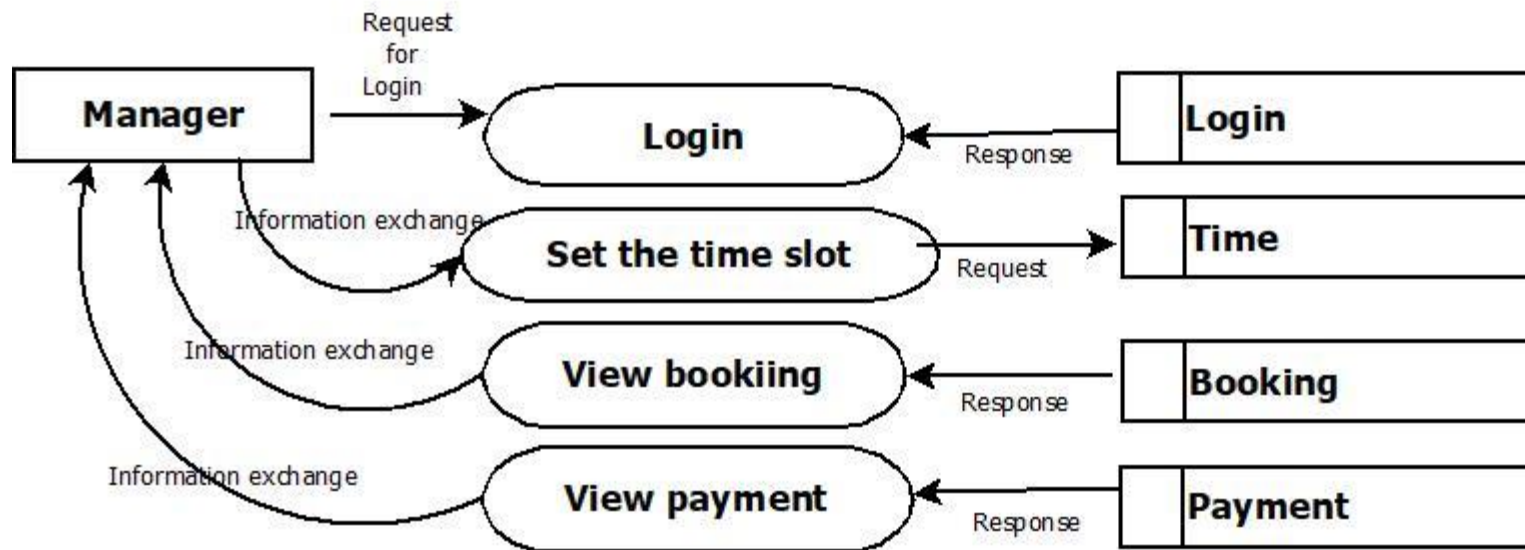

Level - 0

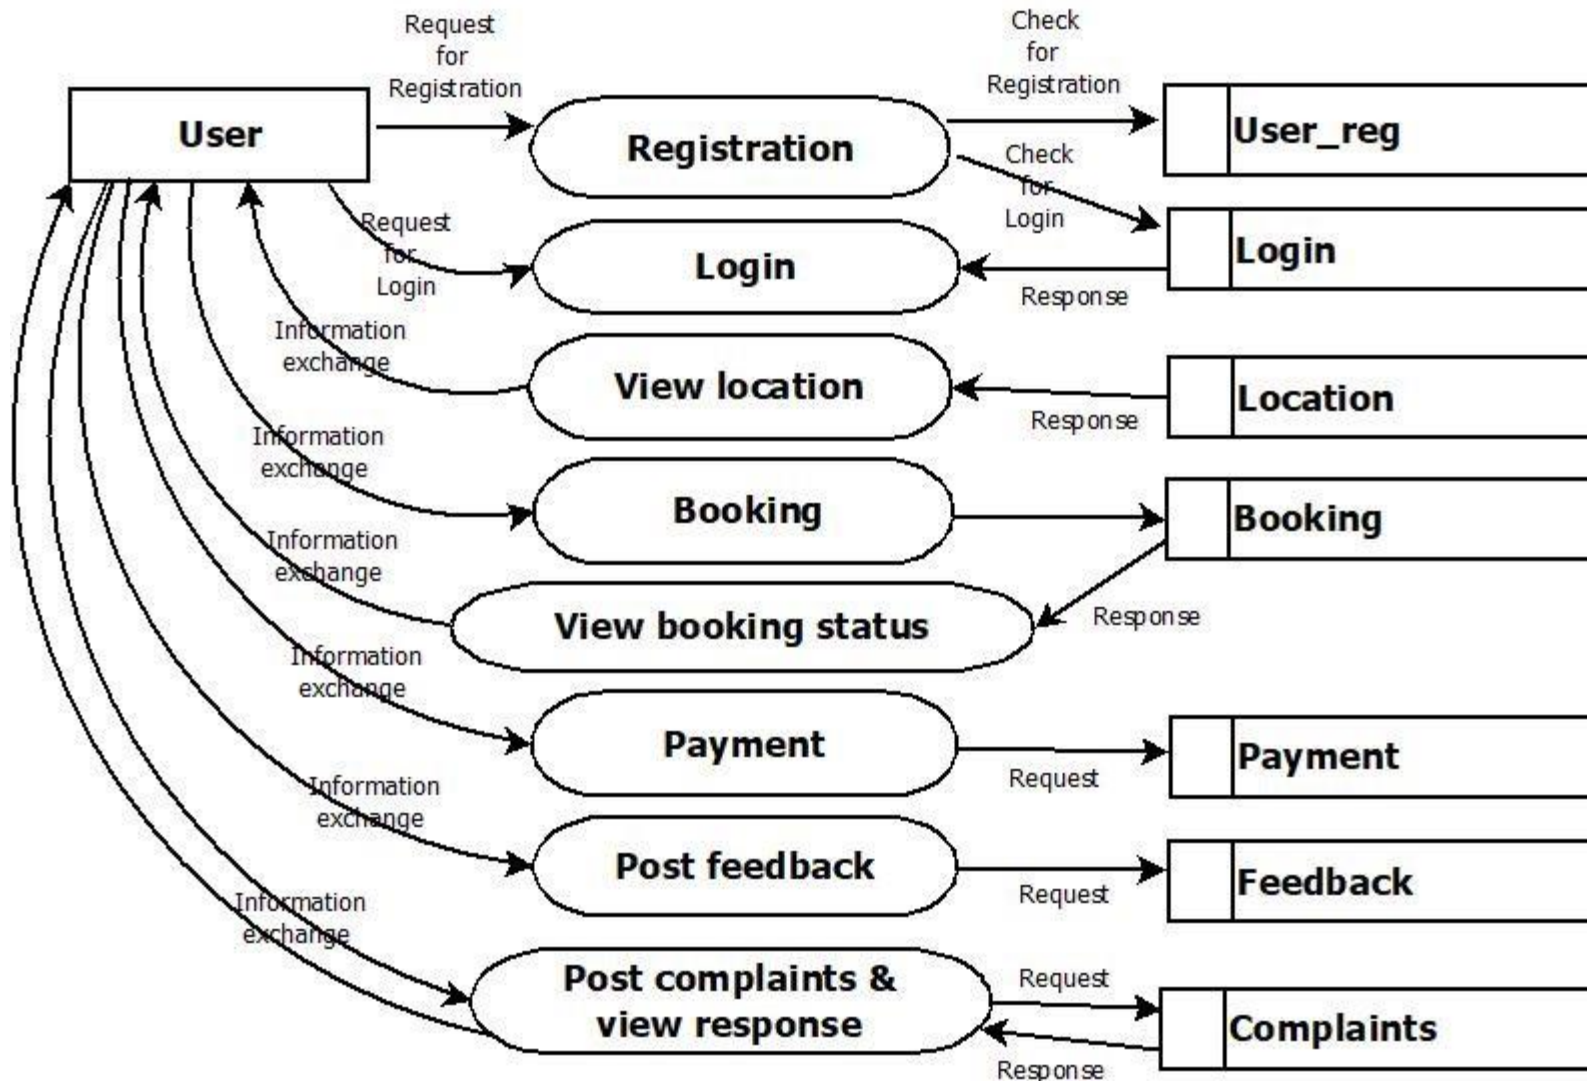

Level – 1 : Admin

Level – 2 : Manager

Level – 3 : User

DEVELOPING ENVIRONMENT

- Language: Python
- Front End: Html, CSS, Java script
- Back end: Python-django
- Database : MySQL
- IDE: PyCharm
- OS: Windows/Linux

Future Enhancements

- We can add live updates of world football.
- We can add other sports activities booking to the project.

PRODUCT BACKLOG
